

Korosten City of Zhytomyr region

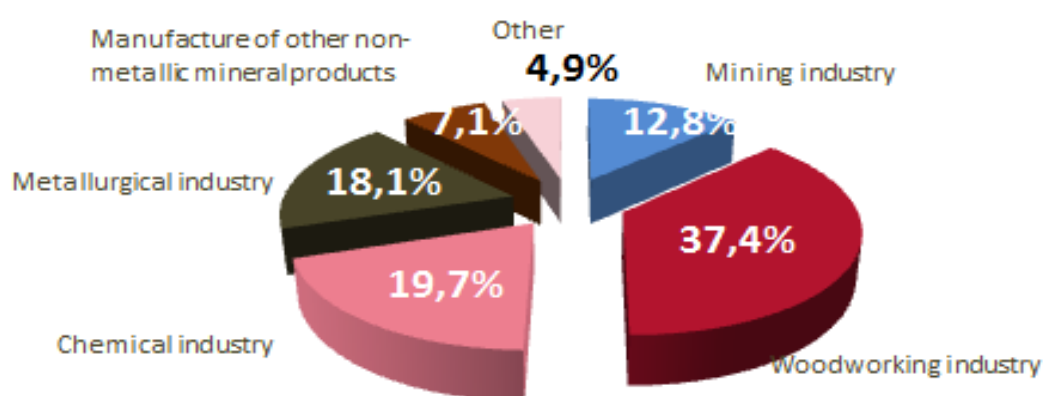

Korosten City is an integral part of Zhytomyr Region in Ukraine with access to the key markets of Ukraine and the European Union by virtue of its position on the E373 and access E40 highways. Market access is also guaranteed through five rail routes suitable for freight and passengers.

With a total population of over one hundred thousand in the region, Korosten has a skilled workforce of almost 40,000 people. A local technical college provides trained personnel for Korosten industry, to which can be added graduates from two universities and other higher educational establishments in the nearby regional centre of Zhytomyr.

Korosten economy has 18 larger enterprises and some 3000 small and medium businesses. The largest sector is related to timber and wood processing from lumber through to furniture, other sectors include machine building and metalworking, raw materials and extractive industries and chemical industry.

The share of enterprises in the production of industrial products

International business is greatly facilitated by the fact that Korosten has its own customs clearance facilities.
